

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site Name:	Slater Steel Corporation
Applicant's Name:	Slater Steel Corporation
Site Location:	2400 Taylor Street Fort Wayne Allen County
VRP Site Number:	6960103
Project Manager:	Andrea Robertson
Date Application Received:	January, 1996
Date Project Completed:	April 27, 1999
Project Duration:	3 years, 3 months
Contaminant Group(s):	Metals
Media Cleaned Up:	Groundwater
Cleanup Goals Achieved:	Tier III Nonresidential
Deed/Land Use Restrictions:	No Potable Water Wells, Nonresidential The groundwater plume is co-mingled with other constituents that are being addressed under VRP Project Number 6960201. If the remediation is not completed under VRP Project #6960201 then this Certificate of Completion and the Covenant Not To Sue are void.

Project Description: The facility manufactures steel products and has been in operation for approximately 100 years. A spent pickle liquor surface impoundment on the site was in use for 25 years.

The facility conducted a study at the surface impoundment and discovered groundwater metal contamination. The site excavated and disposed of contaminated soil in an approved landfill. A site specific risk assessment of the groundwater was completed and demonstrated that the metal contamination of the surface impoundment was protective of human health and the environment in a nonresidential area.
